Discussion: Seasons and Holidays

The Zhodani system of marking the passage of time is, like any other human culture, based on their homeworld and its conditions. A day on Zhdant is 27.02 “standard” hours. On other colonized worlds timekeeping will vary based on local conditions.

Like any other human society, the Zhodani have their traditions and holidays (**zhdanzhdanstial**). Most are common cultural events celebrated throughout the Consulate:

Dranzhrin	Sunbright, the Zhodani new year, on the vernal equinox
Viepchaklstial	Moonday, a lunar festival between Atrint and Vrienstial
Dranzhrinatch	Sunflight, the beginning of winter, celebrated on the autumnal equinox
Kazdievlstial	Harvest festival, celebrated between Ataniebl and Ashtiavl
Teqozastial	Olympiad Day, between Ashtiavl and Atpair every three years
Atlteqozastial	Triple Olympiad Day, added every three Olympiads

These are celebrated routinely throughout the Consulate in varying forms, usually adjusted for local astronomical conditions. Social events are central to Zhodani society and establish a sense of cultural unity and individual belonging.

In addition to these larger collective celebrations, Zhodani also celebrate occasions of individual significance like birthdays (**jdistial**), wedding days (**namstial**) and anniversaries (**nenamstial**). These are usually less flashy than the bigger **zhdanzhdanstial**, but they are no less important. The most significant of these is **Zhinquetstial**, or Ascension Day, the day a Zhodani child who shows significant Psionic potential is elevated to the rank of **Dlenchiepr** (Intendant). It is celebrated once in a child's life and marks what may be their most significant life event.

Zhinquetstial is an emotionally difficult event for the **zhant'ad** family. On one hand, every **zhant'ad** parent hopes that a child of theirs will rise above the parents' lowly station; on the other hand, sending a child off to live with a new family is difficult for any family. For this reason, the Zhodani government goes to great lengths to limit the trauma to the **zhant'ad** family. Once the child's potential has been confirmed, the **Dlenchiepr** and **Zhant'ad** families go through a process of acclimation where the child and parents are given time to adjust to the new circumstances. This can include visits between the families, counseling sessions with psychologists and other mental health professionals, and if necessary, consultations with the **Tavrchedl**. The ceremony itself is planned by both families and thus varies in levels of pomp and grandeur.

One feature is common to every **Zhinquetstial** event, however; that is the presentation of the child with their first **Akatl**, the headband they will wear as the mark of their new status. The **Akatl** is a simple tiara, typically made of a lightweight alloy, and bearing a gemstone that indicates their primary psionic

discipline. At this point, the child begins their new life as a **dlenchiepr**. The zhant'ad family usually gains a bit of status, though never enough to rise beyond their common station, and occasionally may be welcomed into the **Zhdobrdievl** household as workers or retainers, if the situation warrants and the **Zhdobrdievl** household approves the request. This is not common, however, as a clean transition is considered best for both parents and child.

Marriage and Gender Equity

The Zhodani have enjoyed a great degree of sexual and gender equality since their own Dark Ages, largely because psionics does not discriminate between genders. Females and males are equally likely to develop psionic talents, and to the same degree of strength.

Relationships are also egalitarian, with greater acceptance of same-gender marriages than in certain other human cultures, though it is less common among the **zhant'ad** than among **dlenchiepr** and **zhdobrdievl**, given the preference for large families at the lower social strata. Still, advances in reproductive technology such as in-vitro fertilization, artificial wombs, and in extreme circumstances, cloning, allow upper-level **zhant'ad** couples all the benefits of more “traditional” families. Such requests always require the approval of a **zhdobrdievl**, of course, as do marriages.

Same-sex unions between **dlenchiepr** are more common because family size depends more on adoption rather than reproduction. Additionally, **dlenchiepr** and **zhdobrdievl** have significantly more freedoms than **zhant'ad**, and large families at the upper strata are less common.
