Waiter Good afternoon, Dlenchieprs. What will you be ordering?

Azdiazhiepr Good afternoon. We would like the noql egg and kamtoli soup, please.

Waiter Very good, my lady. And for the child?

Kieko Noodles, please!

Waiter Excellent. What kind of sauce do you like on them?

Kieko Viepchaklajo!

Velmiepr Oh! Have you tasted it, Kieko-ki?

Kieko No...

Azdiazhiepr Perhaps something milder. The Dlolplikiajo is very good.

Kieko OK. I'd like that.

Waiter Excellent choice. Will there be more, my ladies?

Velmiepr Some fruit, bread and cheese, please.

Azdiazhiepr And some wine, and fruit juice for the child.

Waiter Excellent.

The following illustrations show a typical Zhodani clock featuring three hands of varying sizes for counting the seconds (**zhinzh** ཟླ་མཚུངས་), minutes (**pitlik** རུང་མཚུངས་), and hours (**achan** རྩེ་མཚུངས་). The outer colored ring indicates the portion of the day or **tyeiaji** (ཨ་ལོ་མཚུངས་), also known as *third*, and it rotates once per day. The clock face itself is divided into ten **achan**,

ཨ་ལོ་མཚུངས་
Teyochali
Midnight; hour 0

ཨ་ལོ་མཚུངས་
Pliebraits
Dawn; hour 10

ཨ་ལོ་མཚུངས་
Stialchali
Noon; hour 15

ཨ་ལོ་མཚུངས་
Pliebrimani
Sunset; hour 20

numbered from 1 to 10 counting spinward (clockwise).

Modern digital clocks mark the time more granularly, having a sequence of four numbers indicating the **tyeiaji**, **achan**, **pitlik** and **zhinzh** in order and indicating the time of sunrise and sunset and possibly, the current weather. However, for aesthetic reasons most Zhodani prefer the analog variety.

The times of actual sunrise and sunset are, of course, flexible and depend on the latitude of the observer; the names are often used simply to mark the transitions between the **tyeiaji**.

tlakolepriazaf

This is by no means an exhaustive list; indeed, there are thousands more adjectives in Zdetl, a few of which will be covered in this book. As mentioned earlier, adjectives can be used either independently or as affixes to other words. For example, in the question

Medaqle?
 𐌚𐌚𐌚𐌚𐌚𐌚𐌚𐌚/
 Is it clean?

Uses the unitary adjectival form of **med** while appending the question indicator **-aqle** to it as the root. However, if one were describing a specific item that was clean, the suffix **-med** is applied to the root:

Stamed.
 𐌚𐌚𐌚𐌚𐌚𐌚𐌚𐌚*
 A clean plate (plate-clean).

And so on. Review the following list of adjectives and practice using them in both forms.

Exercises (Ajozdarad)

Translate from Zdetl to Anglic:

1. Qaplaqla ke noql?
2. Kafi ashtiabl.
3. Pliebrimanipali iqik? Tekicholik!
4. Viepchaklajo bivriantaqla?
5. Dlevens ke abrrstia.

Translate from Anglic to Zdetl:

1. The cheese is sour.
2. I would like hot coffee and fresh fruit.
3. I want spicy food, please.
4. She wants a sweet pastry and coffee.
5. Thank you sir.

Negative Constructions

To make a sentence negative, the word **qlie** (ㄟㄣ) is added at the beginning:

Talqi chteno'd?
ㄘㄚㄗㄣ ㄟㄣㄗㄣ^ㄘ/
Do you want fruit?

Qlie talqi chtenzik.
ㄟㄣ ㄘㄚㄗㄣ ㄟㄣㄗㄣㄗ*
No, I do not want fruit.

Exercises (Ajozdarad)

Give the negative forms of the following sentences, then translate:

1. Talqi iazh kafi chtenzik.
2. Kaqik.
3. Tekicholo'd.
4. Tekicholik, qlie iapanik.
5. Abrrstia talkiens.

Translate, then answer the following questions in the negative.

1. Do you want to eat spicy chicken?
2. Would Kieko like some fruit?
3. Is Velma drinking wine?
4. Is the cheese fresh?
5. Is the fruit spoiled?

Days of the Week

A week on zhdant consists of five days named as follows:

Third day (**teqostial**) is usually a break day.

In addition to the defined days of the week, Zdetl also has the following *independent time adverbs*:

Chistial	ㄗㄣ ㄘㄣㄗ	First day
Omeistial	ㄘ ㄗㄣㄗ ㄘㄣㄗ	Second day
Teqostial	ㄘㄣㄗㄣ ㄘㄣㄗ	Third day
Nachostial	ㄗㄣㄗㄣ ㄘㄣㄗ	Fourth day
Machielistial	ㄗㄣㄗㄣㄗㄣ ㄘㄣㄗ	Fifth Day

shta	±ℓ	now
zeychim	□×ℓ±ℓ	soon
dodlom	□ℓ□ℓ	never
aklamzdeq	ℓ±ℓ□×ℓ	yesterday
akostial	ℓ±ℓ±ℓ	tomorrow
blefr	ℓ×ℓ	today

The Future and Past Tense (chtenz-, daz-)

Actions or events that take place in an upcoming time are expressed using the *future tense*. In Zdetl, the *aspect indicator* construction **chtenzenzh** (±×□×) is appended following the verb, as seen in the chapter dialogue:

Itetl pleshqleo'daqle chtenzenzh?
 ℓ×ℓ ℓ×±ℓ×ℓ^□ℓ±ℓ ±×□×/

This roughly translates into Anglic thusly:

What (item) request-you-question **will-doing**?

Similarly, the *past tense* (an action that has already happened) is indicated by the *aspect indicator* construction **dazej** (□ℓ□×):

Aepreo'daqle dazej?
 ℓ×ℓ×ℓ^□ℓ±ℓ □ℓ□×/

Taste-you-question **did**? (Have you tasted (it)?)

This example is the *past perfective*, indicating an action that has already been completed. In both cases, the *aspect indicator* word follows the verb.

Both indicators are actually composed of a prefix and a suffix:

chtenz - future or potential aspect
daz - past or completed
-enzh - participle ending (-ing)
-ej - perfective ending (-ed)

These can be combined in any of the following forms as needed:

chtenzenzh - future participle (will be doing, will do)
chtenzej - future perfective (will have done)
dazenzh - past participle (was doing)
dazej - past perfective (did, done)

Exercises (Ajozdarad)

1. In the morning we will eat eggs and bacon.
2. We ate chicken curry yesterday.
3. What will be for lunch?
4. Where (**izhia**) will we have tea?
5. What did you eat for second breakfast?
