

ZDETl

Zdetl is the official, standardized language of the Zhodani Consulate of the Traveller universe. Its structure was first codified in Zhodani year 300, five thousand years before the founding of the Third Imperium, and has remained relatively stable in grammar and construction ever since.

This book provides a comprehensive introductory course divided into twelve lessons that build on previous lessons. It is intended for both individual and group study, not only of the grammar and syntax of Zdetl, but also of cultural and historical facts about the Zhodani people.
