

Characters

Both this book and its companion volume **Beginning Zdetl** tell the story of a Zhodani child, Kieko, in her daily life beginning with her origins as a child of **zhant'ad** parents. In **Beginning Zdetl** she is identified as having psionic potential early in life (approximately her third year or first **teqozdij**) and is adopted by a pair of **dlenchiepr**, as is the Zhodani custom, to develop her talents in preparation for her future role as part of the psionic nobility, the **zhobrdievl**.

In this section, Kieko and her **dlenchieprziefri** or Intendant mothers are presented in **Traveller™** terms, with full character sheets and biographies up to the present day (year 1105 Imperial, for the purposes of these books). They are available to players and referees alike and can be freely included in your **Traveller™** games.

Retires from Academia in 3467.2 (1105 Imperial)

Her ship, the *Yolitla* (Opportunity), is a fairly standard *Ninz*-class scout ship and is pictured on page 159.
